

In most home applications, we opt to feature light rather than hide it, but when it comes to theaters and game rooms, you need to think differently. Luminii HÖM, our curated collection of specification-grade residential lighting products, offers a range of solutions that accent in all the right places to create the optimal home theater and gaming experience.

Explore lighting options:

- + Dimmable, Tunable, RGB, or RGBW – we have recommendations to illuminate media spaces from floor to ceiling
- + How to incorporate reflection free accent lighting for spaces intended to be dark and dramatic
- + Discreet and configurable lighting options that disappear in ceilings and floors in both an “on” and “off” state

Theaters and Game Rooms

Media spaces are intended to be experiential, so thinking through a lighting design that's specific to a home application is critical to pull off a dramatic effect. Expertly illuminate every detail of your home theater or game room with Luminii commercial-grade lighting solutions. Whether it's general lighting, dramatic accent lighting, or step lighting, Luminii has your project covered with a wide range of products ideal for media applications.

STENOS Micro Optic Downlights

Architecturally-designed, the STENOS downlight range consists of three discreet micro optic options, producing an output range of 250-1260 lumens. STENOS downlights produce perfect beam quality, a +/- 30° aimable tilt, and highly flexible beam shaping accessories. STENOS is field configurable, featuring a constant voltage design enabling multiple fixtures to operate from a single power supply, resulting in a simplified installation and overall cost savings.

Wall+

Architecturally-engineered and installed in wall applications that illuminate either floors or ceilings, the Wall+ recessed linear system provides outstanding heat sink capabilities allowing it to support high-powered LEDs. Providing constant, even illumination from the beginning to end of the run, Wall+ is available in multiple lengths, and individual fixtures connect easily supporting long continuous runs.

Kendo M Dynamic Color

Luminii's signature architectural linear product line, Kendo M Dynamic Color system is *made to order* up to 144" and can be linked up to 35' offering extreme flexibility for both indoor and outdoor applications. Featuring premium color quality, Warm Dim, Dynamic White, RGB and RGBW, and dot-free, even illumination, the Kendo M Dynamic Color system beautifully illuminates applications including millwork, under-cabinet, and surface mount installations.

Stiletto with Black Lens

With a recessed linear profile, the Stiletto is designed for drywall and ceiling applications. Featuring premium color quality and dot-free, even illumination, Stiletto offers great flexibility in designing continuous straight runs as well as custom shapes complimenting an array of applications. Stiletto lens options are offered in frosted, clear, and black diffusing lenses that creates an almost invisible look when not energized, adding drama to any space.
